VariFit™ NIV Mask

Introducing the VariFit NIV mask offering a further choice to meet your non-invasive ventilation needs. VariFit is a single patient use hospital NIV mask for adult patients featuring advanced AIRgel® cushion technology for enhanced patient comfort. The range includes three variations:

- Vented Mask with an anti-asphyxiation valve for use with single limb breathing systems that do not have a CO₂ leak port
- Non-vented Mask with an anti-asphyxiation valve for use with single limb breathing systems that have a CO₂ leak port
- Non-vented Mask for use with dual limb breathing systems

These variations can be identified by the colour of the mask elbow.

VariFit NIV masks are available in four sizes with a size guide to help select the appropriate mask.
