O2-MAX™

The O2-MAX System can deliver up to 140 L/min of flow to the patient, with 30% FiO₂. Customise your FiO₂ to increase from 30, 60 or 90% with the Trio System. Adjustable PEEP options includes a 3-SET™ (5/7.5/10 cmH₂O) or 5-SET™ (5/7.5/10/12.5/15 cmH₂O) to suit a variety of patient needs.

Additionally, this completely disposable system offers integrated nebulisation while maintaining a consistent flow to the patient. A variety of Quik-Connect™ allow direct fitting of the O2-MAX to wall oxygen for immediate therapy activation.

BiTrac™ ED masks with standard and CAP headgear

The BiTrac ED mask can be supplied separately to integrate the patient interface size range for O2-MAX™. This mask features a dual lip seal and the adjustable Omni-Clip™ to guarantee optimal fit. The connection with the breathing system is a 30M/22F port that fits directly to the O2-MAX patient connections as well as to the ADAPT-2-VENT™ elbows accessories.

ADAPT-2-VENT™ and Cirrus™2 nebuliser

The ADAPT-2-VENT is an adapter elbow that allows the use of the BiTrac ED mask on standard dual limb or single limb ventilator circuits. This allows the patient to move from CPAP, using the O2-MAX to other forms of ventilation without changing the patient interface. The 18M nebuliser that fits the O2-MAX can be supplied separately to deliver nebulised drugs during CPAP therapy.
