

Our quality and environmental system standards

Regulatory requirements and customer needs have driven Intersurgical to obtain certification of our Quality and Environmental Management Systems. We comply with the highest standards and regulations in order to legally design, manufacture, distribute and sell medical devices throughout the world and to give our customers confidence that our products are of the highest quality.

Intersurgical has chosen SGS to provide certification services. SGS was chosen because they have a global reputation and use a transparent and logical approach to certification which helps us to meet our business objectives.

ISO 9001:2015 – Quality Management Systems

Certification to the internationally recognised Quality Management System ISO 9001:2015 enables Intersurgical to demonstrate commitment to quality and customer satisfaction. The framework of continuous improvement of company processes reinforces our corporate culture.

ISO 13485:2016 – Medical Device Quality Management Systems

The basis of all regulatory requirements for placing medical devices worldwide markets is ISO 13485:2016. Regular audits by SGS help to monitor and improve our management systems.

93/42/EEC – the Medical Devices Directive, 2017/745 – Medical Device Regulation

Access into European markets is made possible by certification to the Medical Devices Directive and Medical Device Regulation. This enables CE marking of all Intersurgical products. The combination of certification to this Directive and ISO 13485:2016 is accepted for market entry in many countries.

FDA 21 CFR 820 – Quality System Regulation, USA

All Intersurgical manufacturing sites are registered with the Food and Drug Administration (FDA), which enables Intersurgical products to be sold in the USA.

ISO 14001:2015 – Environmental Management Systems

Customers are increasingly demanding environmentally responsible products and services. Intersurgical Ltd is certified to ISO 14001:2015, demonstrating commitment to minimising our environmental impacts. The system also provides a framework for managing the company's environmental aspects, and complying with relevant legislation.

MDSAP – Medical Device Single Audit Program

Certification to the MDSAP enables Intersurgical to satisfy the regulatory requirements of major medical device markets: Australia, Canada, Japan and the United States, by means of a single audit of Quality Management System.

Product Standards

Intersurgical products are designed to comply with applicable European and International product standards which ensures that performance requirements are met and that our products can be safely used with devices and equipment made by other manufacturers who work to the same standards.
